

AUTOMATION SOLUTIONS FOR MEDICAL AND HEALTH CARE MANUFACTURERS

Mechatronic Medical is a division of Mechatronic Solutions that provides total automation solutions to manufacturers of medical and healthcare devices supporting both high and low volume requirements.

Repeatability, accuracy, reliability and costs efficiency are crucial to successful manufacture in this quality driven sector. Mechatronic Medical enables clients to achieve this by providing a 'concept to delivery' solution supporting projects for from initial concept development to full-scale production.

From Concept to Delivery

Supported by:

- **Project management** from initiation to completion ensures deadlines and budgets are met
- **Traceability** tools and techniques to support quality assurance
- Expertise in **Compliance** and **Regulation** requirements
- Full support, training and **project documentation**
- Systems built for a **clean room** environment
- **Cellular manufacturing** to maximise productivity and competitiveness

We can offer high precision material handling for micro-medical applications and a 'clinical environment' for sorting and testing of medical products. Mechatronic offers solutions for a wide range of medical and healthcare markets including:

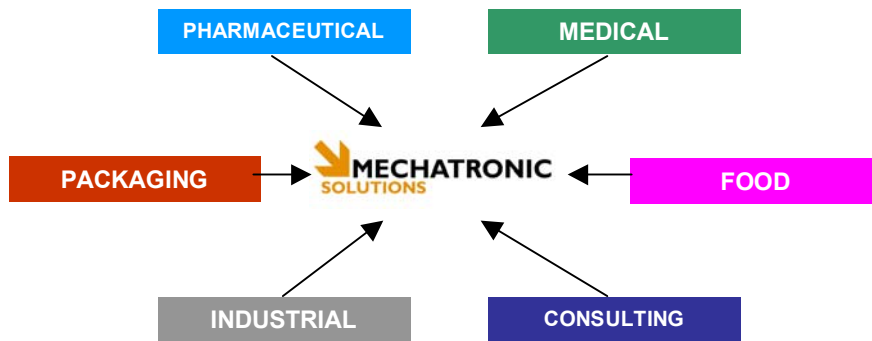

- **Medical device automation and testing**
- **Medical packaging**
- **Surgical devices and appliances**
- **Ophthalmic devices and eyewear**
- **Dental devices**

ABOUT MECHATRONIC SOLUTIONS

Mechatronic Solutions has built an excellent reputation for the design and manufacture of high quality bespoke manufacturing, assembly and test machinery.

- **Wide range of industry experience**

Mechatronic Solutions has completed a large number of projects in a variety of industries including industrial, medical, healthcare, automotive, packaging, business equipment, food, electrical and construction.

- **Trusted Automation Partner**

Over the last 15 years we have helped over 260 customers with successful installations. We work closely in partnership with our customers and our suppliers which include: Telsonic, DOPAG, Adept, RNA, ITEM, HBM, Weiss and EFD. A high proportion of our business comes from repeat work with satisfied customers who recognise that a trusted automation partner is a critical aspect of their project's success.

- **'One stop shop'**

We provide a 'one stop shop' for all your manufacturing needs with expertise to support a wide range of applications including: **-Complete manufacturing cells, robotics, automated micro manufacturing, high precision material handling, automatic assembly machines, test equipment, process control and simple assembly fixtures**

- **Broad range of specialist expertise**

Our wealth of proven experience in leading edge technologies and techniques supports delivery of all types of manufacturing (lean and cellular), single piece flow, kaizen and poke yoke in all types of industry sector. Skill in design, electronics, software, FMEA, SPC and project management ensure on time delivery to budget and specification.

- **Focused on Customer deliverables**

Customers can expect the following benefits from this approach - reduced product and process costs; accuracy and repeatability of process; traceability ; on time delivery of project to budget and specification and innovation.

Can we help you? We will be happy to review your processes and advise you. Our initial consultation is free of charge and entirely without obligation.
