Bringing innovation to the manufacturing process

Mechatronic Solutions has built an excellent reputation for the design and manufacture of high quality bespoke manufacturing, assembly and test machinery.

Over 260 successful installations for many satisfied customers in a wide range of industries over the last 15 years.

Mechatronic Solutions significantly improve efficiency and effectiveness, reduce costs and prevent the manufacture of defective products at source.

Many of our applications arise from repeat business with satisfied customers.

We provide a one stop service for all your manufacturing needs. Our team have a wealth of experience and expertise in:

-) manufacturing
-) cost reduction
-) cellular manufacturing
-) lean manufacturing
-) single piece flow
-) poke yoke
-) design
-) electronics
-) software
-) project management
-) FMEAs
-) SPC

Applications include simple assembly fixtures, automatic assembly machines, test equipment, process controls, robotics and complete manufacturing cells.

MECHATRONIC SOLUTIONS

Mechatronic Solutions has completed successful projects in a variety of industries including automotive, industrial, medical, healthcare, business equipment, paper, packaging, food, electrical and construction.

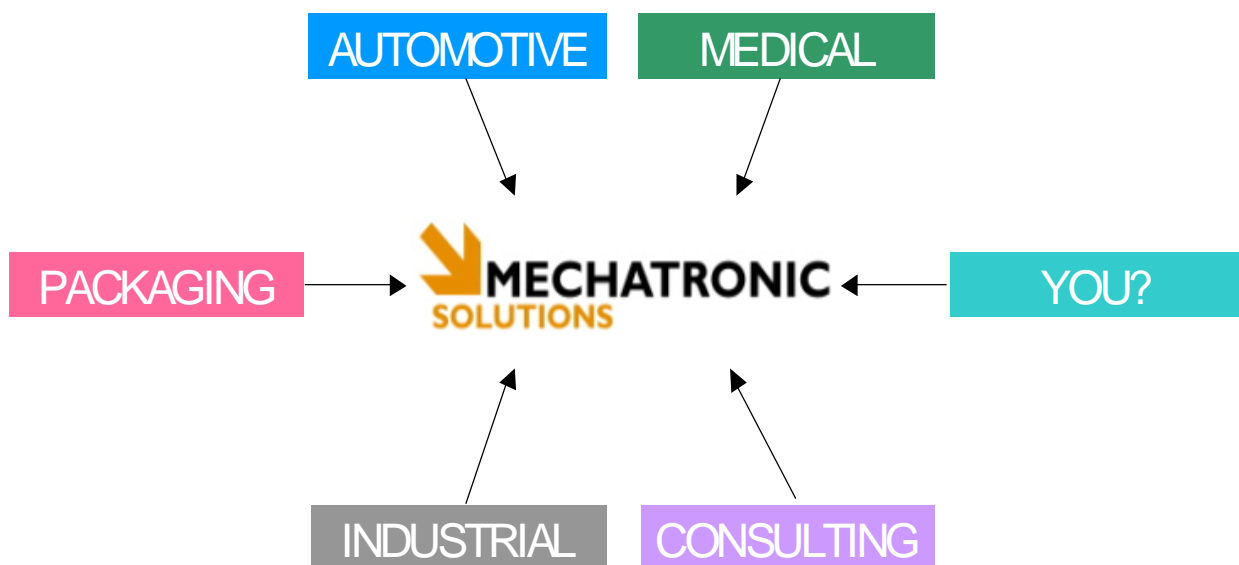

Our approach is to work closely as a team with the Customer to identify the real needs. We are proud of our “concept Kaizen” workshop, where we “mock-up” the machinery and then really focus in on handling times. We can reduce both the product costs and the capital costs. This is a great way to achieve lean manufacturing.

The most effective concept is developed and then taken right through to a fully commissioned installation.

Applications range from small, one of units to complete, integrated systems.

Projects are delivered on time and within budget against demanding targets, thanks to our knowledge, experience and project management skills.

We work in close partnership with well known suppliers including RNA, ITEM, Adept, Telsonic, Dopag, HBM, EFD and Weiss.

Can we help you? We will be happy to review your processes and advise you. Our initial consultation is free of charge and entirely without obligation.
