

Clip Insert Bench

Mechatronic

Control

- 5.7 inch HMI
- NSJ Omron PLC

Reactive clamps

Drawer Slide

Air prep & valves

Lockable castors & Lifting Hoops

Clip Insertion Tool

Typical clipped moulding

- Speaker Fret
- Sat Nav Bracket
- De Frost Grille

Options for clip presence conformation

- Print a label
- Dot mark the moulding

Overview

Mechatronics standard clip insertion bench is a cost effective solution for applying clips to a moulding. Simply load clips into insertion tools with your moulding then close the draw slide and let the machine provide consistent & reliable process clipping.

Features

- Fast & reliable insertion of clips
- Reduce operators risk of repetitive strain injury
- Poke yoke presence of clips on loading & after insertion
- Compact design with small footprint
- Festo air prep with valves to suit your application

Clip Insert Bench

A standard approach to automated clipping
